- 5 Material info

# Doc

The Doc holds your floatant of choice while you're on the water. Its clever design allows you to decide on the day whether you'll use powder or liquid floatant to keep your flies above water.

## Powder

The Doc works with most powder floatants.

## Carabiner

Use the carabiner to attach the Doc to your gear. You can hide the carabiner in the top hole if you prefer using the loop cords.

## Gel

The Doc can easily compress to hold gel floatants securely by looping the back loop over to the front.

## Loop Cords

Thread the FlyBag Harness through the loop cords on the back for the best results; this will keep it from bouncing around.

## Attach to the FlyBag Hero

You can attach the Doc directly to the front of the FlyBag Hero using the fixed cords for quick access.

### Best Shop Owner

Please place your pricetag here so the customer can read this over stacked info sheet.

## Doc | Material Spec

**RAW Corium:** 60% Regenerated leather, 40% Natural rubber

**Elastic Cord:** 50% Polyester / 50% Rubber Threads

**Buckles:** Zinc Alloy

## Our Material

### Raw Corium® / Recycled Leather + Natural Rubber

FlyBag products are made of highly durable and sustainable Raw Corium® which is a blend of recycled spill overs from the Italian leather industry. It's bonded with natural rubber and is very tear resistant. It looks like leather and ages with beauty.

## Sustainability

### Low impact

From day one we aim to keep a low impact on our planet. To do this we put a lot of time in the design process to be able to produce FlyBag in Sweden with as little parts possible.

### Hand made by retired fishermen

Due to our design and development process we can make our products locally without even a factory line. We take great pride in the fact that our products now are assembled by retired fishermen in the heart of Sweden.

### FlyBag LAB

To support sustainable growth and development, we release FlyBag LAB. All FlyBag LAB products are produced in limited edition batches. When we see that the fly fishing community embraces a product, we elevate it to our FlyBag line up. This approach helps us minimize production waste while fueling our passion for developing quality fly fishing products.
