

Sliding Spool Disc

The disc helps you mount any spool on the FlyBag Hero Harness. It easily slides away and back, allowing you to hold 1-2 tippet spools or use it to hold pre-rigged tippet.

1. Thread the Cord

Insert the cord through the center of the spool.

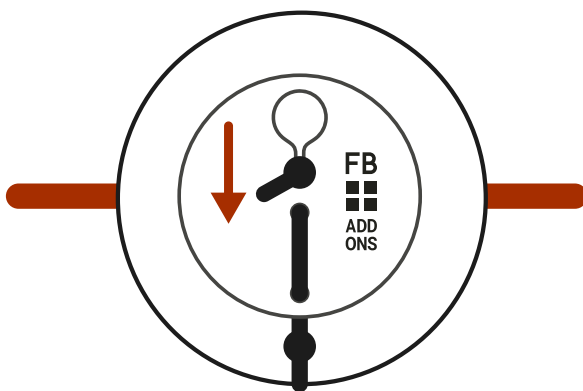

2. Wrap the Cord

Go around the harness with the cord.

3. Re-thread the Cord

Go back through the center of the spool and out through the large hole on the disc.

4. Lock in Place

Pull down on the cord to lock it in place.

5. Tighten the Cord

Pull the other side of the cord to tighten..

Gear Hooks | Material Spec

Base: Birch wood

Elastic Cord: 50% Polyester / 50% Rubber Threads

Sustainability

Low impact

From day one we aim to keep a low impact on our planet. To do this we put a lot of time in the design process to be able to produce FlyBag in Sweden with as little parts possible.

Hand made by retired fishermen

Due to our design and development process we can make our products locally without even a factory line. We take great pride in the fact that our products now are assembled by retired fishermen in the heart of Sweden.

FlyBag LAB

To support sustainable growth and development, we release FlyBag LAB. All FlyBag LAB products are produced in limited edition batches. When we see that the fly fishing community embraces a product, we elevate it to our FlyBag line up. This approach helps us minimize production waste while fueling our passion for developing quality fly fishing products.
